

Azure Consultancy as a Service

Unleash Azure's Potential with Continuous Expert Engagement

We have created a specialised team dedicated to helping our clients achieve the full potential of the Microsoft Azure platform. Our focus is on providing exceptional support to our customers in terms of management, governance, and security. With our extensive knowledge and experience, we can assist customers in harnessing the benefits of Azure, including cost savings, increased flexibility, and improved efficiency.

Our expertise is not just in managing technology; it's in understanding it. Our Azure CaaS is designed to provide regular, scheduled consultancy throughout the year, moving beyond ad-hoc or call-off support to deliver continuous and proactive engagement. This service is tailored to meet the unique needs of each customer.

Helping you to navigate the complexities of the cloud and achieve your business objectives.

Service offerings include

- / Health Checks:** Regular Azure environment reviews for health and efficiency.
- / Security Posture Management:** Regular security reviews and remediations to maintain strong security posture.
- / Small Works Requests:** Delivery of minor changes without extra charges.
- / Partner Liaison:** Coordination with partners for Azure adjustments.
- / Disaster Recovery:** Comprehensive DR and backup testing with BCDR documentation.
- / Performance Optimisation:** Azure infrastructure analysis and optimisation for performance.
- / Compliance Assurance:** Ensures compliance with audits and industry standards through detailed reporting.

Why choose Kick ICT?

With a dedicated team of consultants, project managers, and technical experts, Kick ICT is equipped to offer comprehensive consultancy services, backed by support escalation for a seamless IT management experience. Our approach is designed to empower your business with the right technology and strategic insight, ensuring you achieve and maintain a competitive edge.

Key Features

/ Tailored to Your Specific Business Needs: Our services are customised to meet the specific needs of each customer, providing flexibility and precision in addressing your Azure challenges. Our consultancy time can be applied towards a variety of tasks, from routine maintenance and health checks to ensure your IT infrastructure's optimal performance, to strategic project work and ad hoc tasks that require specialised attention.

/ Expertise and Experience: Leveraging years of experience in Azure services, our team of qualified experts offers unparalleled insights and recommendations to maximise your cloud investment. We pride ourselves on staying ahead of the curve, delivering forward-thinking strategies and innovative solutions that drive efficiency, scalability, and resilience in your Azure environment.

/ Consultative and Collaborative Approach: Our team acts not just as a service provider, but as a trusted advisor, fully invested in the success of your business. We aim to foster a partnership that extends far beyond technical support and provides continued value.

/ Continuous and Proactive Support: Unlike traditional consultancy models, our service offers continuous engagement, ensuring that your Azure environment remains efficient, secure, and aligned with your business objectives throughout the year. This strategic partnership empowers your organisation with ongoing innovation, adaptability in the face of changing technology trends, and a competitive edge in leveraging cloud capabilities.

Why Choose Kick for Azure Consultancy as a Service

We have created a specialised team dedicated to helping our clients achieve the full potential of the Microsoft Azure platform. Our focus is on providing exceptional support to our customers in terms of scalability, resilience, and security. With our extensive knowledge and experience, we can assist customers in harnessing the benefits of Azure, including cost savings, increased flexibility, and improved efficiency.

Whether our clients are new to Azure or seeking to enhance their existing infrastructure, our focused practice is designed to provide them with the expertise and guidance they need to realise the full potential of the Microsoft Azure platform. With our support, customers can have confidence that they have an expert partner to help them navigate the complexities of the cloud and achieve their business objectives.
